RE: Letter of Recommendation

To Whom It May Concern:

Lindsay Allen has been with SEL for over 2 years. She has grown in her role as a Software Engineer Intern. Lindsay enjoys her work, she brings clarity, and is very dependable. She is great person to work with and a good team player.

At SEL, she got a chance to work on several projects. It required her to learn and exercise different skills. Her skillset includes C++, Python, Typescript, JavaScript, Angular, Nodejs, MongoDB, Google Test unit test framework among other things.

Lindsay has found her passion in Web Development. Her most recent project is to develop a full stack Web Application which will host documents and test results. It is now very close to its first release.

To conclude, I'll say Lindsay on the path of becoming a very capable Software Engineer. She has got a wide skillset and good analytical skills. She will be a valuable employee as she is to SEL.

Sincerely,
Rohan Shroff
Software Engineer
Schweitzer Engineering Labs
