RE: Letter of Recommendation – Lindsay Allen

To Whom It May Concern:

It is my pleasure to recommend Lindsay Allen as an asset to your team.

Lindsay has worked as a Software Engineering Intern for SEL, Inc. since January 2018. During that time, she has either reported directly to me or to an engineer reporting to me.

Lindsay has been a model intern, throwing herself into her work regardless of difficulty or experience; her willingness and ability to learn new and challenging skills are highly valued by myself and her engineering team. Her growth, skillset, and attitude reflect our company culture and values; she is a model intern to her peers.

She has worked and grown in many technical fields, including C++ application development and unit test, Python module development and instrumentation automation, and backend/frontend development in TypeScript. Her creation and development of our library documentation system is generating a lot of excitement amongst our engineering teams, including teams at other office locations.

Lindsay is an excellent team member and is praised for being friendly, approachable, and always willing to try and learn new things. Her ability to research, self-educate and apply what she has learned in a rapid timeframe makes her a highly valuable asset to any organization, regardless of discipline.

Please feel free to contact me using the information above should you like to discuss Lindsay's qualifications and experience further. I'd be happy to expand on my recommendation.

Respectfully,

Kenji Yamamoto
